SUMMARY

Informatics graduate from Telkom University (GPA 3.94, 2024) working as IT Development Staff at PT Fajar Mas Murni. Builds and maintains internal web systems — budgeting, sales monitoring, reporting, and interactive dashboards — with PHP (CodeIgniter), SQL Server, and modern front-end stacks. Comfortable turning raw business data into clear, decision-ready tools.

WORK EXPERIENCE

PT. Fajar Mas Murni
Mar 2024 – Present

IT Development Staff (Contract)

- Develop and maintain internal web-based systems for budgeting, sales monitoring, and reporting.
- Build interactive dashboards that visualize business data for faster, data-driven decisions.
- Implement budgeting features — input forms, calculations, and monitoring tools — plus gross-margin simulation for strategic planning.
- Transform large datasets into structured reports for sales performance and financial tracking.
- Refine UI/UX, test, debug, and iterate on features based on cross-functional stakeholder feedback.

PT. Fajar Mas Murni
Mar 2024 – Aug 2024

IT Development Intern

- Troubleshot enterprise web applications built with CodeIgniter.
- Developed CRUD-based authentication features for internal systems.
- Collaborated with the development team to verify bug fixes and flows; built dashboards for business insights.

Telkom University
Jun 2022 – Jun 2023

Practicum Assistant (Operating System & Computer Network) — Assistant Lecturer (Discrete Mathematics)

- Graded laboratory journals and weekly assignments; validated online quiz questions before release.
- Delivered lab sessions on operating-system and networking concepts; supported students on forums and final assignments.
